

2023 EXPENSES

Office: This year's main project was building an office space at Tabarak Children's Home. The office was built to help place children into foster homes, take in new children, and provide social work services.

Tailoring College: Tailoring is a popular profession in Kenya. We purchased 8 sewing machines to help start a tailoring college for the children at Tabarak and the surrounding community.

Nonprofit Start-Up: These expenses helped us pay a one-time fee to become an official 501(c)3 status organization, making all of your future donations tax-exempt. This category also covers website and domain expenses until October 2024. As years go on, these expenses will continue to decrease!

School: This year we covered all the kids' school expenses at Tabarak Children's Home. We were able to provide school supplies, books, uniforms, and school fees.

Internet: This cost covered the router and full installation of internet at the orphanage as well as 1 year of monthly expenses.

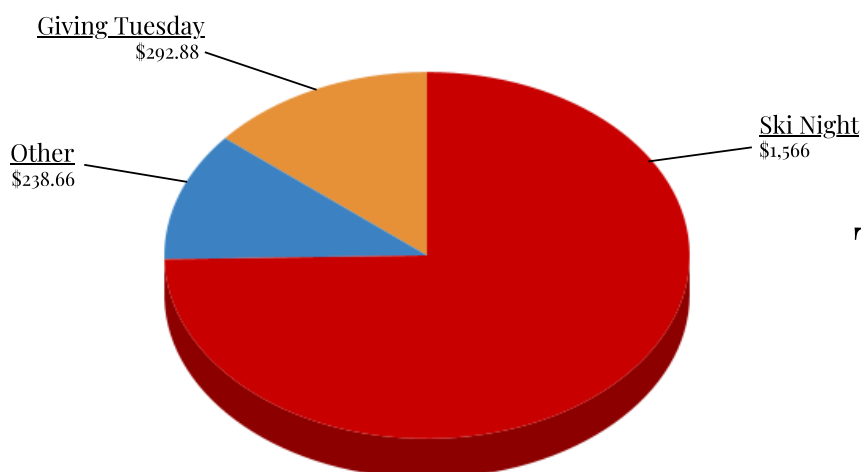

Security: To keep the tailoring machines and future computer college safe, security is essential. This cost included purchasing and installing a gate made by a professional who was born and raised at Tabarak.

Computer College: We are currently fundraising to start a computer college at Tabarak, adding to the skills and education provided in this community. These expenses helped cover the first construction steps for this project.

Orphanage Support: The orphanage support category includes electricity bills and allowed us to purchase bedding for the orphans.

Marketing/Fundraising: This category covers items purchased in Kenya for future fundraising events. These expenses will be utilized in the future to help give back to the community. We are committed to making sure every dollar spent in this category will result in a 200% return.

2023 DONATIONS
